

Determine your Future as an expert in working in Enclosed Spaces!

Confined Space

Attendant

Upon completion of Confined Space Attendant training, the student will:

1. Describe the entry permit
2. Define the system for preparation, issuance, use, and cancellation of the entry permit
3. Understand permit-required confined spaces
4. Practices to mitigate hazards encountered while working in a confined space
5. Instruct your workers on the proper use of equipment
6. Understand the duties of the Attendant, Entrant and Supervisor

Confined spaces can be deadly. **In 1997, the regulations were introduced in order to control industry and the self-employed.**

It is now the law that if you are involved with entering, controlling or supervising people involved with confined space work you must have received training. **Failure to comply with the 1997 Confined Space regulations can result in prosecution. People are killed or seriously injured in confined spaces every year all over the world.** This includes a large number of people trying to rescue others without sufficient equipment or training.

Course Outline

Confined Space Attendant

Overview

This Confined Space Attendant safety training course will help you identify the hazards of permit-required confined space entry, including the signs, symptoms, behavioral effects, and consequences of hazard exposure of confined space entrants.

Learning Outcomes:

Upon completion of this course, the participants should be able to:

- Describe the entry permit.
- Define the system for preparation, issuance, use, and cancellation of the entry permit.
- Understand permit-required confined spaces.
- Practices to mitigate hazards encountered while working in a confined space.
- Instruct your workers on the proper use of equipment.
- Understand the duties of the Attendant, Entrant and Supervisor.
